

Dear Sirs;I own a trucking company and have the XM radio installed in my Semi trucks. We have found the XM radio has help my drivers not only with 24 hour weather but with keeping in contact with news, sports, audio stories and music. All of which helps my drivers to be alert and aware of current events and weather. Local traffic reports on XM give all drivers a single source for multiple sites of traffic information. These sites are generally unknown to travelers through any specific geographical location. XM has compiled a single signal to provide traffic and weather reports for the driver or traveler. These are necessary for safe and efficient operation of all travel.

Thank you

Tonie Rolleston Prose
